MADE IN INDIA,
FOR INDIAN HOMES.

Voltas, a part of the Tata Group was founded in 1954 and is India’s most trusted and largest air conditioning brand. Beko, on the other hand, is an international home appliances brand of the Arcelik Group owned by Koc Holding - a Fortune Global 500 company in Europe. Together, we have formed Voltas Beko.

The company is taking the government’s ‘Make in India’ initiative forward by manufacturing Direct Cool Refrigerators in the country, at our factory in Sanand, Gujarat. In addition, Voltas Beko appliances include features that are customised for Indian homes and are guaranteed to simplify the daily life of Indian consumers.
**DISHWASHER**

**AquaFlex™** your dishwasher’s muscles

Wash all kinds of tableware in the dishwasher with AquaFlex™ technology.

Whether it’s porcelain or plastic, AquaFlex™ enables the adjusting of water pressures to the lower and upper baskets gently, providing A-class washing and drying results for all kinds of dishes.

**BENEFITS**

- Provides efficient and gentle washing for all kinds of dishes.

---

**CornerIntense™**

- **Every single dish, cleaned to perfection with** CornerIntense™

CornerIntense™ ensures that dishes in every corner are rinsed out effortlessly.

The advanced CornerIntense™ feature ensures that even the dishes and glasses kept in the corners come out looking spotless. In comparison to conventional dishwashers, the spray-arm in this dishwasher is more elongated and designed to move in a unique way. This helps the water and detergent reach the corners of the baskets easily.

**Control your dishwasher from anywhere at home with HomeWhiz™**

- The HomeWhiz™ app lets you select the washing cycle of your choice right from your phone.

The HomeWhiz™ app connects your smartphone to the dishwasher with the help of a Wi-Fi connection, so you can monitor and control functions from anywhere in the house. The application also includes an exclusive feature called Infinity Program, which gives you access to a wide range of washing programs that are best suited for your utensils.

**Dishwashing now gets Aquaintense™**

- **The Voltas Beko Aquaintense™ technology creates a power zone in the lower basket by providing intense water pressure.**

This specially designed 360° rotating head helps water reach the nooks and corners of dishes and cleans even heavily soiled pots and pans. It provides a dedicated function and stronger washing power by applying higher water pressure in the lower basket power zone.

**Save time and energy with the Mini 30’ Program**

- **Perfect** for lightly soiled dishes and glasses, the Mini 30’ Program washes a full load in 30 minutes at 35°C, thus saving time and energy.

**BENEFITS**

- Saves time and energy.
ProSmart™ Inverter Motor

Save power with ProSmart™ Inverter Motor
The ProSmart™ Inverter reduces friction in the motor.

Helps lower noise and energy consumption. Due to its magnetic design, the motor has a low frequency, and fewer vibrations. The absence of bearings in the design also helps reduce mechanical noise.

Along with superior energy efficiency, Voltas Beko's ProSmart™ Inverter Motor provides low mechanical friction, lowers noise levels, and improves durability.

Fast+
Get it done in a jiffy with Fast+
The ProSmart™ Inverter Motor increases the washing temperature, and adjusts the water pressure. This function also speeds up washing cycles up to 3 times.

Ultimate Glass Care

Ultimate Glass Care consists primarily of two features: GlassShield™ Technology and SteamGloss™ Technology

GlassShield™ Technology
Water hardness inside the dishwashers can be regulated manually by optimising the mixture of water from the tap and water from the softening unit. With this technology, better protection against glass corrosion is obtained as compared to standard dishwashers.

SteamGloss™ Technology
With an extended heat application of 1.0 minutes inside the dishwasher, the size of the water droplets is reduced and glossiness is improved.

Give your dishes the Ultimate Glass Care

BENEFITS
GlassShield™ Technology - Protects glasses from cloudiness and hardness.
SteamGloss™ Technology - Enables you to dry your glasses without losing their brightness making them shine 23% more.

BENEFITS
Ultimate Glass Care - Increases washing efficiency by regulating the water hardness.
